

## ML982\_30 Stainless Steel Utility Shelf with Holders and Hooks

### Material Specifications

- #304 Grade Stainless Steel Body, Holder Brackets, Hooks & Rail
- #3 Satin Finish
- Heavy duty spring activated rubber mop and broom grips (held by nickel plated pins)

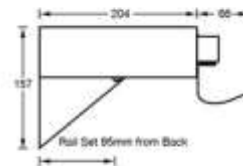

### Dimensions

- **ML982\_30:** 765mmW x 157mmH x 270mmD / Holders: 3 / Hooks: 2 / Rail: 645mmW / Mounting Holes: 4

### Installation Guidelines

- *May be subject to Australian Building Code Regulations for height and location fixing and may be subject to placement as per architectural drawings. In all cases, this is the responsibility of the installer.*
- It is recommended that these units be securely fixed to the substrate (e.g. noggins) or that suitable fasteners or anchors are used to securely affix the unit to the plasterboard, concrete or brick wall.

1. Locate and mark height on wall and mark using the fixing holes, ensuring unit is level and even.
2. Drill holes into substrate, insert fasteners or anchors and loosely secure unit to wall surface using screws and wall plugs provided.
3. Check the hook strip is level and tighten screws to finish installation.

### Operation

- A mop or broom handle is pushed into grip-jaw of the rubber holder with an upward motion until it locks into place. The spring in the holder and gravity allows the handle to stay locked in position.
- This holder is designed to keep mops and brooms away from the wall. The hooks are conveniently located on the front of the shelf for rags or hand towels.
