

MLRB327_SS 300mm Bariatric Straight Grab Rail

Material Specifications

- #304 Grade Stainless Steel
- 32mmØ Rail with 1.4mm Wall Thickness
- #304 Stainless Steel Concealed Mounting Flanges
- 78mmØ Twist Lock Flange Covers
- Mounting Flanges Welded to Grab Rail for Maximum Strength

Dimensions

300mm C to C

Mounting

■ Concealed Fix - 78mmØ Mount

Installation Guidelines

- May be subject to Australian Building Code Regulations for height and location fixing and may be subject to placement as per architectural drawings. In all cases, this is the responsibility of the installer.
- Fixings and anchors are not included with the units and are the responsibility of the installer to appropriately fix the unit to the wall.
- Locate fixing position on wall or partition and mark using mounting holes, ensuring the unit is level.
- Mount the concealed mounting flanges to the wall using appropriate fixings (not supplied).
- Slide covers over mounting flanges, ensuring the raised edges of the flange lines up with the dimples of the flange cover. Twist and lock into place.
- Check the unit is level to finish installation.

Safety Warning

 Ensure that there is proper structure support within the wall. Grab rails are no stronger than the anchors and walls to which they are attached. Grab rails must be firmly secured in order to support the loads for which they are intended.

NOTE:

- This unit is accessible compliant when installed in accordance with AS1428.1. guidelines.
- It is the responsibility of the installer to ensure that the surface/substrate that the unit is installed upon and the fixings used are suitable to withstand the weight bearing loads of the unit and if required as per AS1428 / Australia building code regulations. This Grab Rail has been tested to support up to 350kg of downward force when installed correctly.

(accessible compliant) when installed in accordance with the guidelines.

This product is AS1428.1 compliant
