

METLAM AUSTRALIA SHOWER CURTAIN CARE AND MAINTENANCE GUIDE

Retaining the great condition of your Metlam Australia Shower Curtains is just a matter of a few simple steps. Routine cleaning of your Metlam Australia Shower Curtains will prevent any stubborn stains building up. Follow our step-by-step guidelines listed below:

The best method to clean shower curtains is to regularly treat them with a simple homemade cleaning solution, rinse and allow them to drip dry. Some homemade cleaning solutions include.

- Diluted Bleach
- A blend of distilled water and lemon juice
- Diluted White Vinegar

Other methods include hand washing in lukewarm water with soap or mild detergent. When it comes to machine washing, wash on a gentle cycle, add a capful of mild detergent and ½ cup of vinegar. Add three to four old towels to balance out and help in dissolving the stains and built up. After washing it is best to rinse thoroughly and air-dry the shower curtain or hang it fully extended in a place where it can get air circulation.

If there is a stubborn stain, use a sponge or an old toothbrush to scrub away the debris before rinsing.

Do not use tumble dryer on hot cycle.
