## Product Code Changes on Selected Metlam Australia Products

We are excited to inform you of recent enhancements to our product management process at Metlam Australia. In our continuous efforts to refine and optimise our operations, we have implemented a series of product code changes for selected product items.

Understanding that adapting to new codes may require a brief adjustment period, Metlam Australia wants to assure you that we are committed to minimising any potential disruptions to your workflow. To facilitate a seamless transition, we have taken proactive measures to ensure that our system will continue to recognise the old product codes for a designated period. This grace period will allow you and your team the time needed to familiarise yourselves with the updated codes and integrate them smoothly into your processes.

At Metlam Australia, our priority is to provide you with the highest level of service, and these changes are geared towards enhancing your overall experience with our products. We appreciate your understanding and cooperation during this transition, and our dedicated customer service team is readily available on **1300 Metlam** to assist with any queries or concerns you may have.
